

TG2012

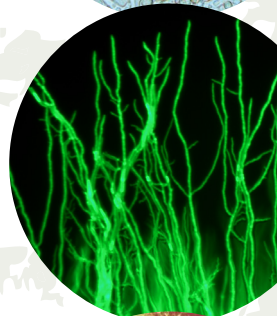

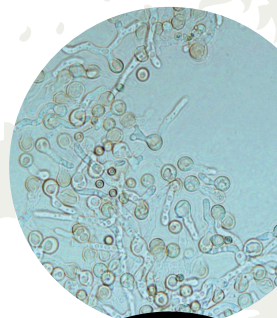

Innovations and Applications

The 12th International *Trichoderma* and *Gliocladium* Workshop will focus on innovative research involving *Trichoderma* species.

The workshop will present current research in a range of disciplines, including Biotechnology, Omics (encompassing taxonomics), Fungal Communication and Biocontrol, and highlight future directions for *Trichoderma* applications in agriculture and industry.

Prizes will be awarded for the best presentations by emerging *Trichoderma* researchers.
